## FONT & COLOR TIPS

Some useful things to remember about designing for Digital Outdoor is Color and font Selection. One of most important that your ad not only be relevant, but also clear in communicating.

One of the most common mistakes is color use between background and foreground elements. Colors that are high in contrast tend to draw the eyes attention, whiles colors of similar shading and hue tend to blend together and get lost.

Another common mistake is font selection. Choose bold fonts, typically Sans Serif font styles that are strong and heavy, and can be viewed from greater distances. Serif fonts are useful in long bodies of text but less effective on short messages designed for impact.

## COLOR GUIDE

The chart below ranks the 14 most visible color combinations, with 1 being the most legible.

## CHOOSING SUPPORTING PHOTOS

Selecting photos is as important as any other element in your design. Choosing photos that are over busy will lose your message and may get lost when combined with supporting text. It is best to choose a photo that is simple, high in detail and has good color range and contrast.
